

Vasilev, Mihail M.D. **Checkpoint 8 Sprint 5 Review - Marcio** 23-12-2022**Vasilev, Mihail M.D.** 21 days ago

I need to achieve the MVP by the end of next sprint. All unit tests, admin features and last regular user features need to be done. Documentation also needs to be finished. Business layer coverage needs to be complete.

Describe what goes well according to your teacher, what you should pay more attention to and what is your next step to achieve the learning outcomes...

[Post Feedback](#)**Checkpoint 7 Sprint 4 Review - Marcio** 09-12-2022**Vasilev, Mihail M.D.** a month ago

Overall my progress this time is good. I need to finish authorization and authentication for different user types (admin user, regular user). I also need to fix my code coverage of sonarqube and unit tests covering.

Checkpoint 6 Sprint Review 3 - Marcio 18-11-2022**Vasilev, Mihail M.D.** 2 months ago

I need to fix the arrows on the C4 in the design decision document. I need to add more citations in my research document. In the .yaml file I need to fix a few things. I need to do the unit tests for the unhappy flow too. Overall I need to continue working on the project.

Checkpoint 5 Sprint Review 2 - Marcio 14-10-2022**Vasilev, Mihail M.D.** 3 months ago

I need to add description below each of the C4 diagrams explaining what is shown. I need to make a small change in the research document. In the back-end I need to remake some of my functions in my controller classes so that they follow the main concepts and best practices.

Checkpoint 4 Marcio 07-10-2022**Vasilev, Mihail M.D.** 3 months ago

I asked about the documentation that I need to submit for sprint 2. I need to finish the Design document with explaining the architecture and how SOLID is implemented. I also need to fix the C4 diagram, specifically the C3 layer. I also need to write the questions and sub-questions for the Applied research document.

Checkpoint 3 Freek (ind project) 19-09-2022**Vasilev, Mihail M.D.** 4 months ago

I need to add more information about the business part and why I am actually doing the project. I need to rethink some of my user stories, their priorities and fix the position of some of the tables so that the document is more easily readable. I also need to add names to the sprints so that it is easier to understand the main topic of the sprint.

Keep up the good work!

Checkpoint 2 Marcio 16-09-2022**Vasilev, Mihail M.D.** 4 months ago

I need to finish working on the Project Plan and Backlog for the individual project. About the Project Plan - update the work plan, add a paragraph about testing and features, update deliverables and the rest of the document. About the Backlog - refine user stories. I also need to add "verify" command in unit tests to make sure that the tests pass.

Checkpoint 1 parking garage - some next steps are needed 29-08-2022**Vasilev, Mihail M.D.** 4 months ago

About the UML diagram I must add a condition about when a driver can exit the parking lot. I also need to rethink the way the "finance" informs the garage that the driver has paid for their stay.

**Mossavat, Iman S.I. (Teacher)** 4 months ago

I liked your solution. Right level of complexity and get it almost right the first time and relatively fast delivery. Keep it up, Mihail!
